Notre Dame Journal of Formal Logic is published quarterly by the University of Notre Dame in January, April, July and October of each year. The Journal is composed by Beljan, Dexter, Michigan and printed by Cushing-Malloy, Inc., Ann Arbor, Michigan. Second-class postage paid at Notre Dame, Indiana 46556.

Authors should consult the "Guide to authors" for editorial information. Articles and editorial correspondence should be sent to *B. Sobociński, Editor*, P.O. Box 28, Notre Dame, Indiana 46556, U.S.A.

Subscriptions are \$20.00 per year for institutions and \$15.00 for individuals. Back volumes are \$10.00 each for Volumes 1-9, \$16.00 for Volumes 10-16. Orders for subscriptions and back volumes (accompanied by payment), and changes of address should be sent to the *Business Manager*, P. O. Box 5, Notre Dame, Indiana 46556, U.S.A.

CONTENTS

On prosleptic premisses. By <i>Czesław Lejewski</i>	1
Leśniewski's analysis of Russell's antinomy. By <i>Vito F. Sinisi</i>	19
A note on the axiom of choice in Leśniewski's ontology. By <i>Charles C. Davis</i>	35
Algebraic semantics for S_2^0 and necessitated extensions. By <i>R. Routley</i> and <i>H. Montgomery</i>	44
A first-order logic of knowledge and belief with identity. I. By <i>Scott K. Lehmann</i>	59
An addendum to my paper "A categorical equivalence of proofs." By <i>Manfred E. Szabo</i>	78
On the eliminability of de re modalities in some systems. By <i>Jonathan Broido</i>	79
Un estudio de la lógica algebraica desde el punto de vista de la teoría de categorías. By <i>Luis M. Laita</i>	89
Les algèbres de Heyting-Brouwer et de Łukasiewicz trivalentes. By <i>Luisa Iturrioz</i>	119
Über Kongruenzen höherer Operationen. By <i>Günther Frei-Imfeld</i>	127
An independent statement about metric spaces. By <i>Maurice Machover</i> .	131
Consistent, independent, and distinct propositions. II. By <i>Anjan Shukla</i>	135
An alternative to Brian Skyrms' approach to the Liar. By <i>Paul Vincent Spade</i>	137
Definitions of semantical reference and self-reference. By <i>Brian Skyrms</i>	147
On the relation between free description theories and standard quantification theory. By <i>Richard E. Grandy</i>	149
Some notes on "A deduction theorem for restricted generality." By <i>M. W. Bunder</i>	153
On Nachbin's characterization of a Boolean lattice. By <i>William H. Cornish</i>	155
A patching lemma. By <i>K. K. Hickin</i> and <i>J. M. Plotkin</i>	158
Significance logics. By <i>Ross T. Brady</i>	161
Negation disarmed. By <i>Robert K. Meyer</i>	184
On some modal logics related to the \mathbf{L} -modal system. By <i>Robert L. Wilson</i>	191
A first-order logic of knowledge and belief with identity. II. By <i>Scott K. Lehmann</i>	207
A species-algebraic interpretation of the intuitionistic propositional calculus. By <i>Jekeri Okee</i>	222
Temporal modalities and the future. By <i>Vaughn R. McKim</i> and <i>Charles C. Davis</i>	233

A further examination of Saccheri's use of the "consequentia mirabilis." By <i>Cyril F. A. Hoormann, Jr.</i>	239
Axiom sets equivalent to syllogism and Peirce. By <i>Ivo Thomas</i>	248
A note on the adequacy of translations. By <i>William Frank</i>	249
Three identities for ortholattices. By <i>Ladislav Beran</i>	251
Pledger lemma and the modal system $S3^\circ$. By <i>Bolesław Sobociński</i>	253
Consistency of n -order logics. By <i>William J. Thomas</i>	257
An Herbrand theorem for prenex formulas of LJ . By <i>Kenneth A. Bowen</i>	263
Shortest single axioms for the classical equivalential calculus. By <i>Jeremy George Peterson</i>	267

NOTRE DAME JOURNAL OF FORMAL LOGIC

Guide to authors submitting articles for publication

Articles are invited for publication in the Journal which bring new results to any of the following areas: algebraic logic, classical logical systems, constructive mathematics, methodology of deductive systems, model theory, non-classical formal systems, proof theory, recursion theory, and set theory. The Journal is devoted primarily to logic and the foundations of mathematics and papers which are historical or philosophical in nature will only be considered for publication provided they employ the methods of formal logic in their exposition.

Manuscripts should be typewritten with wide margins on bond paper, using double (or triple) spacing between lines throughout (including notes and references). Particular care should be given to allow sufficient space between lines containing subscripted and superscripted symbols. Each page of the manuscript (including notes and references) should be numbered. The first page should contain the article title and author's name. The last page should contain the institutional affiliation and the exact mailing address. A concise abstract should accompany each article. Authors have full responsibility for the proper preparation of manuscripts. When the manuscript is not properly prepared it may be returned to the author for retyping; services performed by the editorial offices in this regard are properly chargeable to authors. The original copy of the manuscript should be submitted (to only one journal at a time); authors should retain one copy of everything submitted.

Footnotes should be indicated by consecutive superscript numerals and listed with wide spacing between lines at the end of the article. Footnotes may appear in print at the bottom of the appropriate pages, but should nevertheless be submitted in this form. A footnote which acknowledges a debt of the author to a foundation grant or individuals should be indicated by an asterisk.

References should be cited by consecutive numerals in square brackets and listed with wide spacing between lines at the end of the listing of footnotes.

A **list of symbols** used should be submitted with the manuscript. This list may be headed "Note to the Printer"; it should not define the symbols mathematically, but should identify them typographically. Authors should underline various types of symbols in different colors throughout the manuscript, blue for bold, red for Greek, green for Gothic and other characters. It is suggested that authors refer to back issues of the Journal for examples of the style of composition.

Proof sheets are generally given authors for correcting errors that occur in composition. However, any special composition costs arising out of an author's revision of text of an article in proof will be charged to the author.

Fifty offprints without covers of each article will be supplied free of charge. Additional offprints or covers for offprints may be purchased.

Editorial correspondence and articles should be sent to:

B. Sobociński, Editor, P.O. Box 28, Notre Dame, Indiana 46556, U.S.A.

The Journal is published quarterly by the University of Notre Dame. Subscriptions are \$20.00 per year for institutions and \$15.00 for individuals.
